-----------	--

## OVERVIEW

With our inspection kit, you get the components you need to easily keep track of all your equipment. By RFID labeling all your products, you can track your annual inspection in a smoother way as it can be more easily linked to the RFID tag on the product than manually filling in a serial number.

The package includes a reader, a USB cable, 30 RFID tags and 30 keychains. The reader is a simple RFID reading and writing device for your USB-equipped computer, which means that you do not need any special software to start using the reader.

The RFID tags are suitable for indoor and outdoor use and are engraved with the Cresto logo.
