OVERVIEW

ST Flex Soft EAS is designed to suit those who need to move or climb while working at heights. With double hooks, you always have a hook anchored when you move with the other hook – ensuring optimal safety when climbing various structures.

The fall arrest lanyard is manufactured as a flexible tube with internal elasticity, which allows you to stretch the line to a maximum length of 1.9 meters. At the beginning of the rope, there is an external absorber mounted which is released and make sure you are not hurt in case of a fall.

The cover on the absorber can easily be replaced if it becomes dirty or damaged.
