## OVERVIEW

A single fall arrest lanyard provides secure protection when working on skylifts and scaffolding.

Fusion Single-Flex S is manufactured as a flexible tube with internal elasticity, which allows you to stretch the line to a maximum length of 1.8 meters. At the beginning of the rope there is an external absorber mounted which is released in case of a fall. Unlike Fusion Twin-Flex S this fall arrest lanyard is ANSI certified and are approved for a user weight up to 140 kg. Between the absorber and the lanyard there is an aluminum ring to increase flexibility in use
