OVERVIEW

A single fall arrest lanyard provides secure protection when working on skylifts and scaffolding.

Energy Single-Flex has the same functions as Energy Twin-Flex except that it has only one webbing and one hook instead of two. Energy Single-Flex is manufactured as a flexible tube with internal elasticity, which allows you to stretch the line to a maximum length of 1.8 meters. At the beginning of the rope there is an external absorber mounted which is released in case of a fall and catches you. The cover on the absorber can easily be replaced if it becomes dirty or damaged to ensure that the rope underneath is protected in the best way.
