OVERVIEW

Armur Single-S is one of the smallest and lightest self retractable lanyards on the market with webbing. With a robust and attractive design and outstanding strength and features, Armur Single-S is suitable in environments such as mobile platforms and scaffolding. A self retractable lanyards can be a smoother alternative to a 2 meter fall arrest lanyard as it gives great freedom of movement.

The block has been tested and approved for horizontal use and its self-retractable and self-locking makes the braking mechanism reacts smoothly and limits the users fall distance to a minimum.
