Fall Arrest Lanyard 1302-TFA

-

EN 355 : 2002

Product description

A double fall arrest lanyard is designed to suit you who need to move when you work at heights. With double hooks you always have a hook anchored when you move with the other hook. This is to provide the optimum security during work at, for example, pylons, wind turbines or industries. Energy Twin-Flex Cover+ is designed with a flexible tube with internal elasticity, which allows you to stretch the line to a maximum length of 1.8 meters. At the beginning of the lanyard there is an external absorber mounted which is released in case of a fall and catches you. The cover on the absorber can easily be replaced if it becomes dirty or damaged to ensure that the rope underneath is protected in the best way. Energy Twin-Flex S has ANSI certified hooks and carabiner and can withstand a user weight of up to 100 kg. The fall arrest lanyard can also be purchased with a protection cover.
