## Harness 1124

- Patented attachment webbing loops in front
- Designed to fit women as well
- Ergonomic support belt for positioning

EN 358 : 2018

EN 361 : 2002

### Product description

The design of the harness and the adjustable shoulder straps provide optimal user fitting in terms of size and comfort. Making the harness "one-size", it enables users from approximately 165 cm to 195 cm in height to fit the harness quite nicely. The patented attachment webbing loops are located at waist height to keep the lanyard/rope out of the way as much as possible, and to give the user a free field of operation, as well as not putting pressure against the chest while working and climbing. In the event of a fall the loops move up to the chest providing a high attachment point, positioning the body correctly in a fall. Same basis design as harness 1123, equipped with a support belt.
