Product description

Introducing the Cresto Rigger Base, a rope access harness designed for professional technicians. Featuring fixed adjusters for a natural fit and optimal balance, it eliminates the need for openable buckles. Constructed using highly durable NordGuard webbing, it withstands extensive use in harsh conditions. With a removable top section, the Rigger Base Pro can be adapted for every different use. Without a built-in chest ascender, it offers flexibility to pair with any other preferred models, such as the Harken Ninja. Integrated tool loops with attachment rings ensure smooth and easy access to your gear. Ideal for rope access work that demands uncompromising comfort and simplicity.
