Standards: **EN 355 : 2002**

## Product description

Energy Twin-Flex is a double fall arrest lanyard with flexible webbing for work in, for example, scaffolding, mobile platforms and industries.

A double fall arrest lanyard is designed to suit you who need to move when you work at heights. With double hooks, you always have a hook anchored when you move with the other hook. This is to provide the optimal security on, for example, scaffolding, mobile platforms or industries.

Energy Twin-Flex is manufactured as a flexible tube with internal elasticity, which allows you to stretch the line to a maximum length of 1.8 meters. At the beginning of the rope, there is an external absorber mounted which is released in case of a fall and catches you. The cover on the absorber can easily be replaced if it becomes dirty or damaged to ensure that the rope underneath is protected in the best way.
